

London CIV

Role: Responsible Investment Analyst

Contract Type: Permanent

Location: Southwark (Hybrid working arrangements where operationally practical, with a minimum of two days required in the office)

London CIV is an FCA authorised and regulated firm set up by London Local Authority Local Government Pension Schemes (LGPS) to meet their asset pooling requirements. The 32 London LGPS authorities are our clients and shareholders, and their beneficiaries and London's taxpayers are our key stakeholders.

Our strategic purpose is straightforward “**Working together to deliver sustainable prosperity for the communities that count on us all**”. We are here to deliver solutions which will allow LGPS client funds to invest assets on behalf of beneficiaries to provide improved and more efficient investment outcomes. We aim to add value for our clients through economies of scale, greater efficiency, and improved performance.

Purpose

As a member of the Sustainability Investment Team, the Responsible Investment Analyst will support the Responsible Investment Manager in climate change risk reporting and analytics. Both with regards to London CIV's own annual TCFD reporting and disclosures, quarterly investment reports and client climate risk analytics

Responsibilities

- Conducting analytical research on the impact of ESG factors on the performance of a range of Public and Private investment portfolios and reporting these in line with TCFD, FCA and DLUHC requirements
- Support the Responsible Investment and Investment Team by maintaining ESG and climate analytical tools, and templates and strategy monitoring.
- Support responses to client relations team for RI-related client queries
- Clearly communicate insights and technical approaches to clients verbally and in writing, including documenting analytical methodologies
- Quantifying material ESG impacts on LCIV and partner funds and reporting these in line with UNPRI, TCFD, UNSDG and UKSC guidelines

Experience and Education

- A relevant degree, (i.e. economics, finance, natural resource economics, environmental sciences) or proven work experience as a data analyst
- Experience of working with Bloomberg, Power BI and Python; desirable
- Experience of engaging with corporate entities on climate risk, desirable but not essential

Skills, Knowledge and Attributes

- Good communication skills combined with the strength to influence and catalyse change through engagement and stewardship of companies
- A genuine interest in the impact of climate risk on portfolio performance
- Excellent written and spoken English, with other languages desirable
- Good understanding of business and how sustainability can be integrated into investor decision-making related to risk management and environmental reporting
- Very strong organisational skills
- High competency in the use of databases, Excel spreadsheets and other analytical tools
- Good attention to detail
- Numerical proficiency with natural curiosity, and an innovative approach to problem-solving
- Personable, with a demonstrated strength in planning and executing work assignments independently
- Self-motivated, organised, detail-oriented, with a positive, “can do” attitude

Core Values

London CIV has four core values that we aspire to as an organisation and is expect from every individual who comes to work with us. These core values are:

- Collaboration
- Responsibility
- Integrity
- Diversity

Application Process

Please apply submitting your CV and short covering letter (in no more than two pages of A4) demonstrating how you meet the requirements of this role and also confirming your salary expectations, right to work in the UK, and notice period to recruitment@londonciv.org.uk

We will not consider any applications that are received without a covering letter.

Closing date is 30 August 2024

Due to the number of applications, if you do not hear back from us within 1 week of the close date, please consider your application as unsuccessful.
